MK Redway Navigator

Media pack for MK Digest · 27 October 2026

https://mkredway.co.uk

Independent walking and cycling navigation for Milton Keynes' Redways.

What the app offers

Compare Max Redway, Balanced and Fastest cycling choices; see mapped route mix, road share, distance and estimated time. Walking mode, navigation guidance, device-local saved places and prepared offline maps/routing are also available.

Status and development

Current published beta: v0.14.16, released 18 October 2026. Development began in September. The source code is public on GitHub under the MIT licence, with substantial AI-assisted development and testing.

Testing and next priority

The developer reports limited personal real-world testing; most testing has been automated or simulated. The next priority is feedback from MK walkers and cyclists to improve reliability and usability.

Images supplied

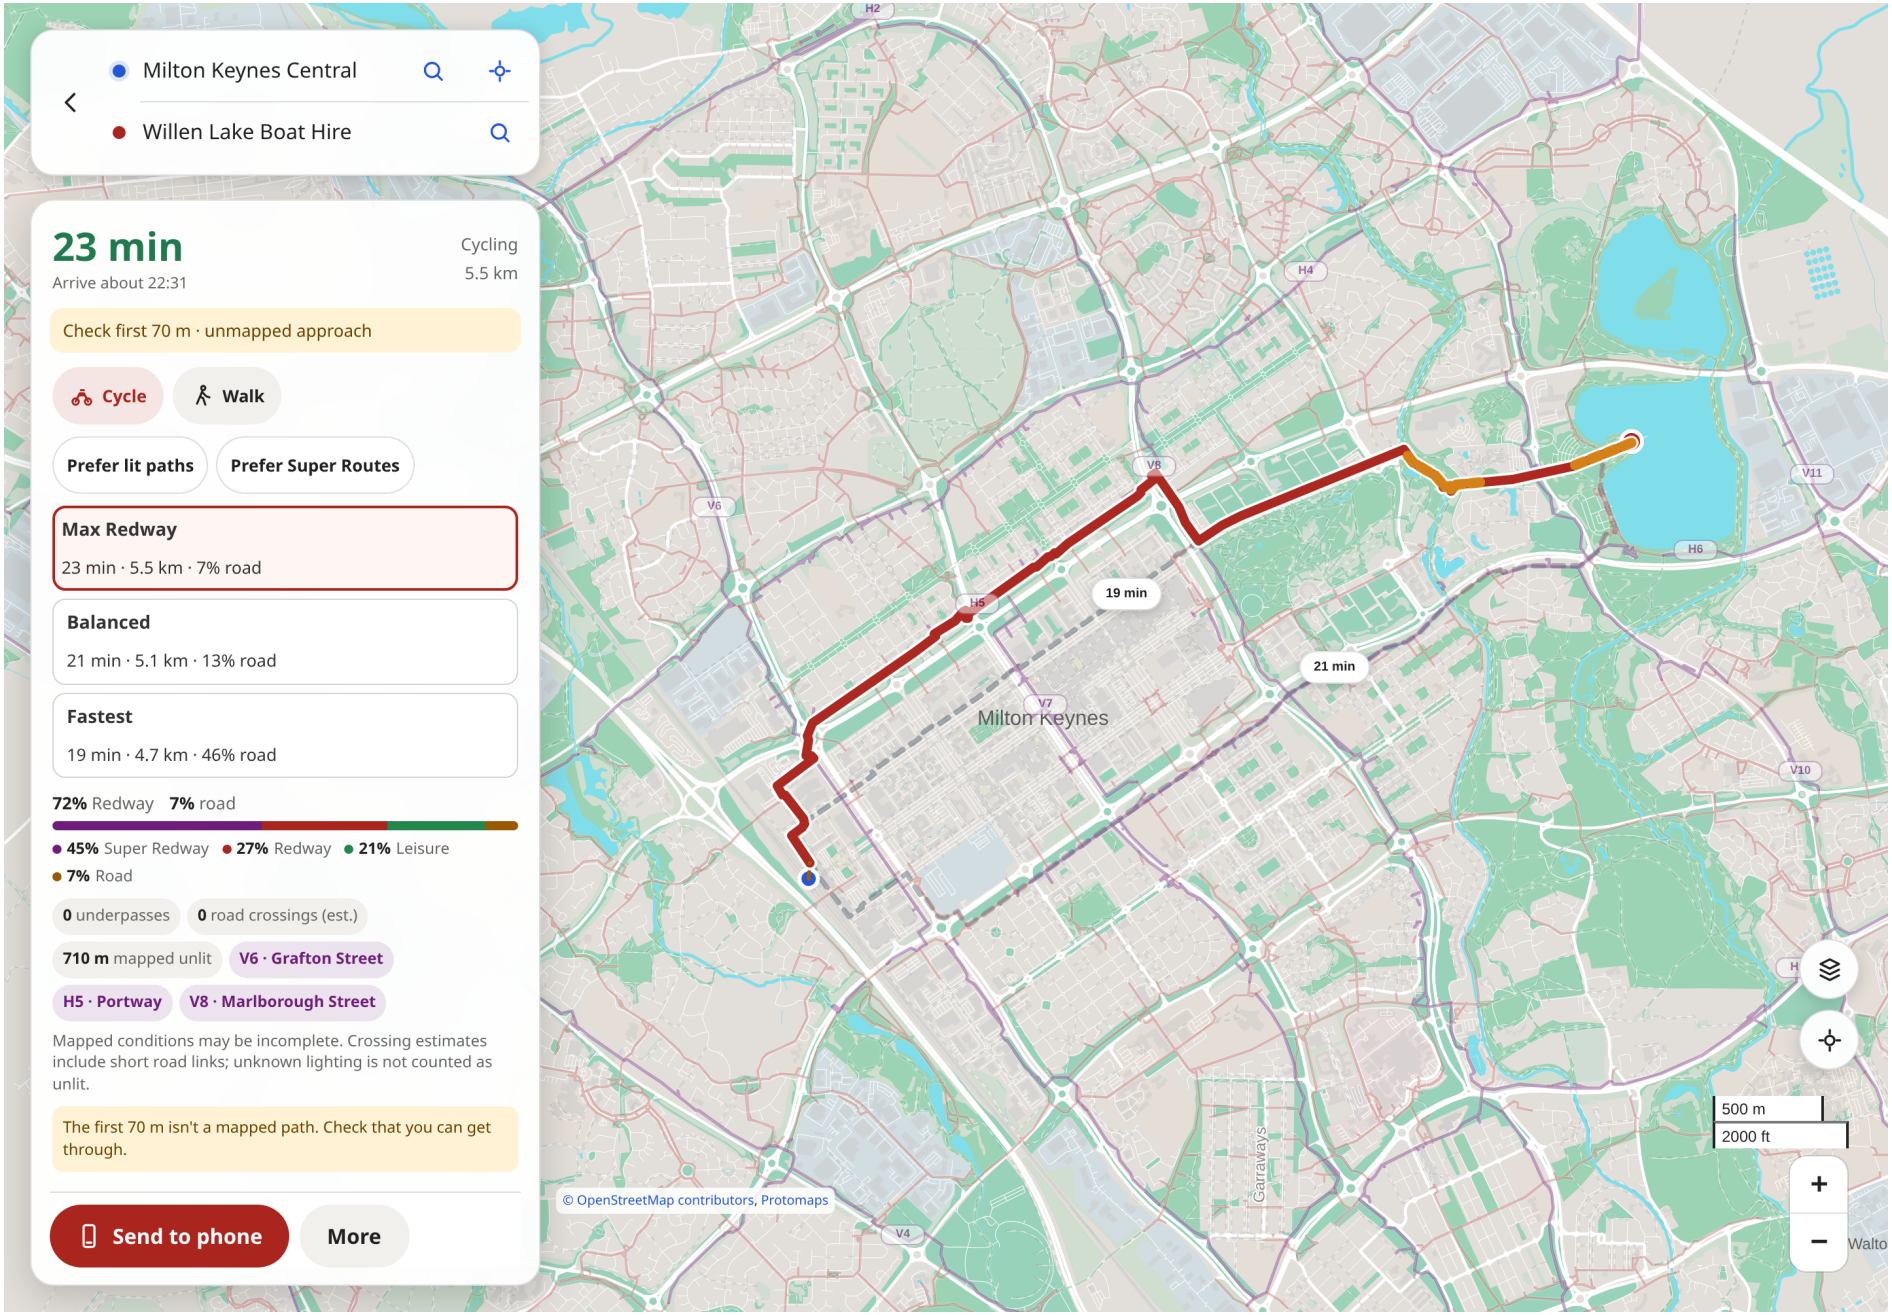

Two high-resolution PNG screenshots: a 2880 × 2000 desktop route comparison and a 1290 × 2796 mobile Explore screen. Also supplied: the approved 1024px PNG logo, original SVG container and 512px app icon. The SVG contains raster artwork.

Credits and context
